

WE MAKE WAREHOUSE A BETTER PLACE

**WAREHOUSE
PICKING
SOLUTION**

A dark, blurred background of a server room. In the foreground, a handheld device with a screen is visible, displaying some interface elements. The overall tone is professional and technical.

APPLICATION OVERVIEW

01

Simplifies the picking operation while increasing its **Accuracy & Productivity using a mobile-app with easy and simple text based directions**

“

Do you own a distribution center that specializes in fast picking, or a warehouse full of pallets and cases that is challenging to manage?

SolGenie's **iActo** helps you overcome these challenges by providing an app with a friendly user interface, increasing the **speed and accuracy of picking**

”

APP FEATURES

02

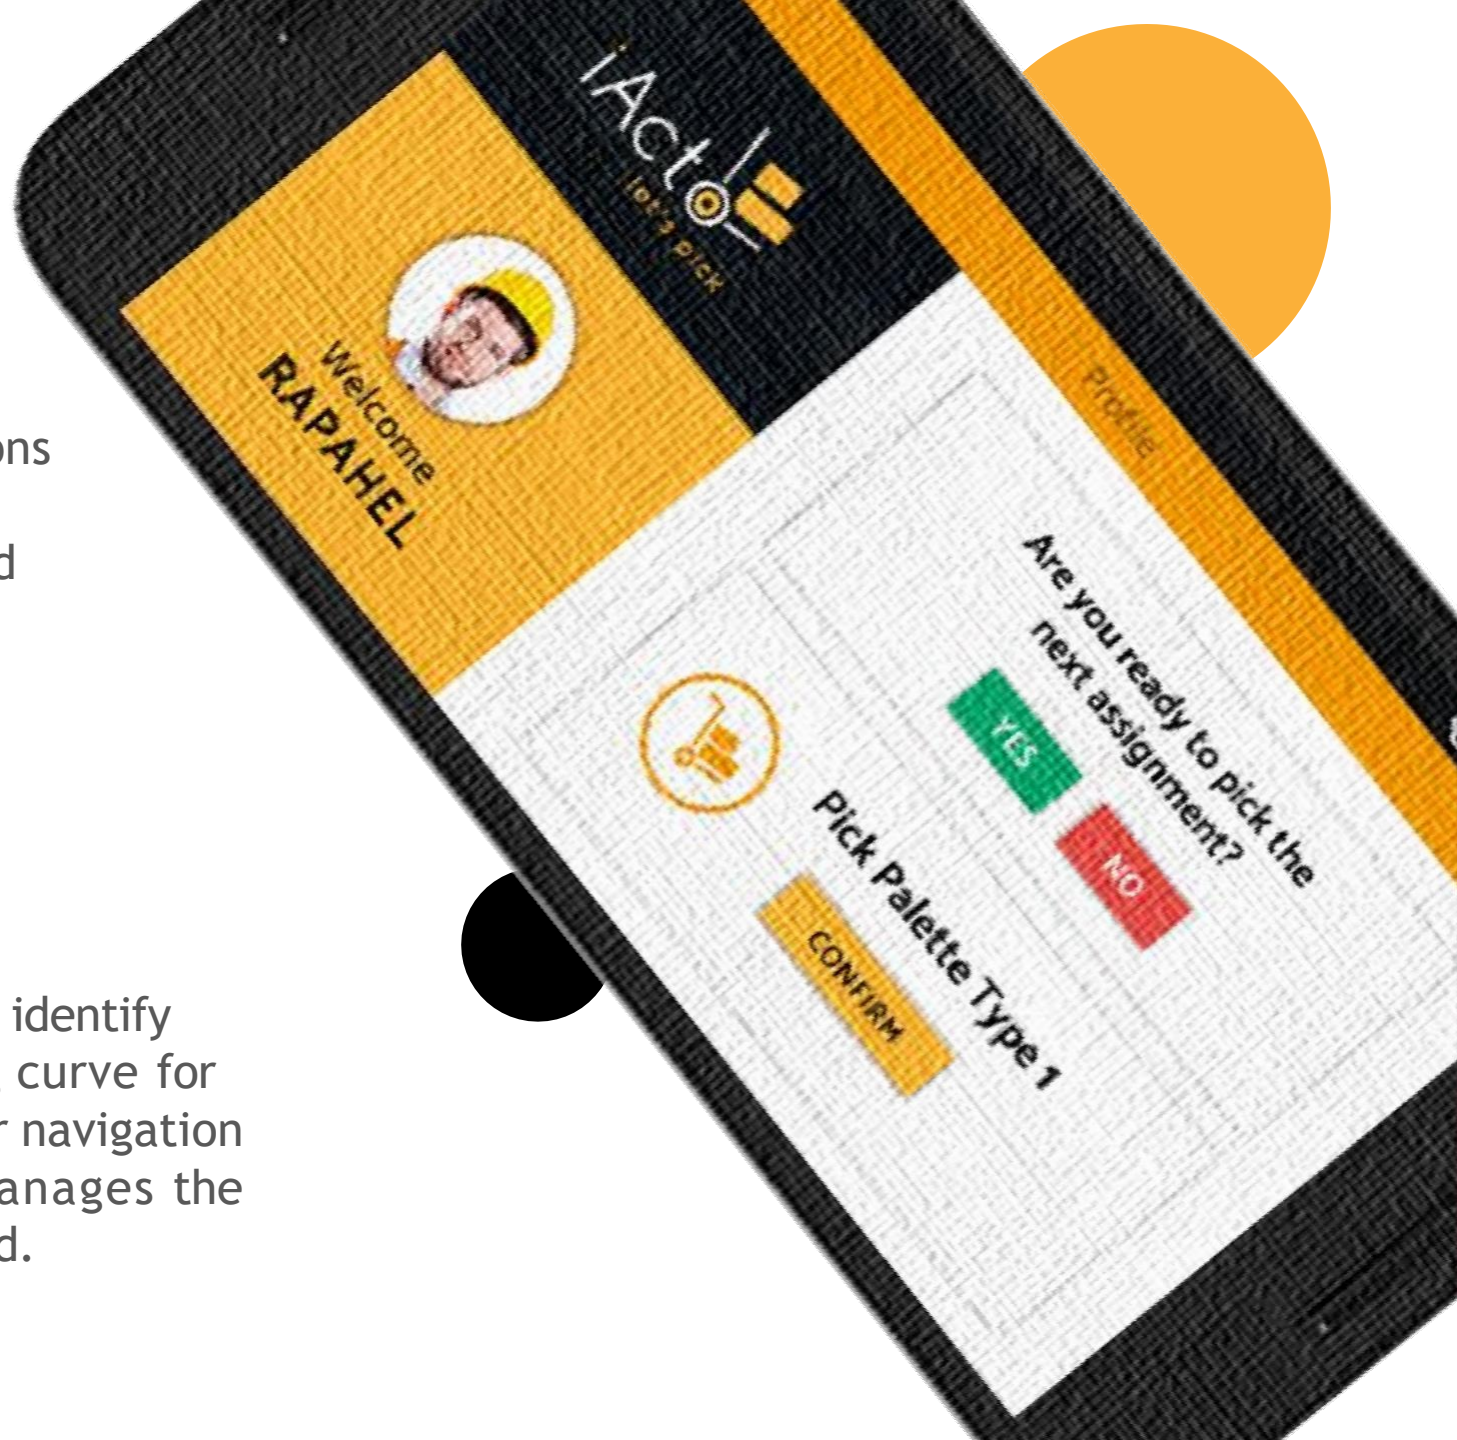

INCREASE ACCURACY

The app provides text based instructions that point to item locations with images of the items; thus significantly increasing accuracy and productivity.

NAVIGATE FASTER

Text-directed input helps the picker identify items quickly. With an Easy learning curve for seasonal workers, quicker and faster navigation for experienced workers, the app manages the complete picking process end to end.

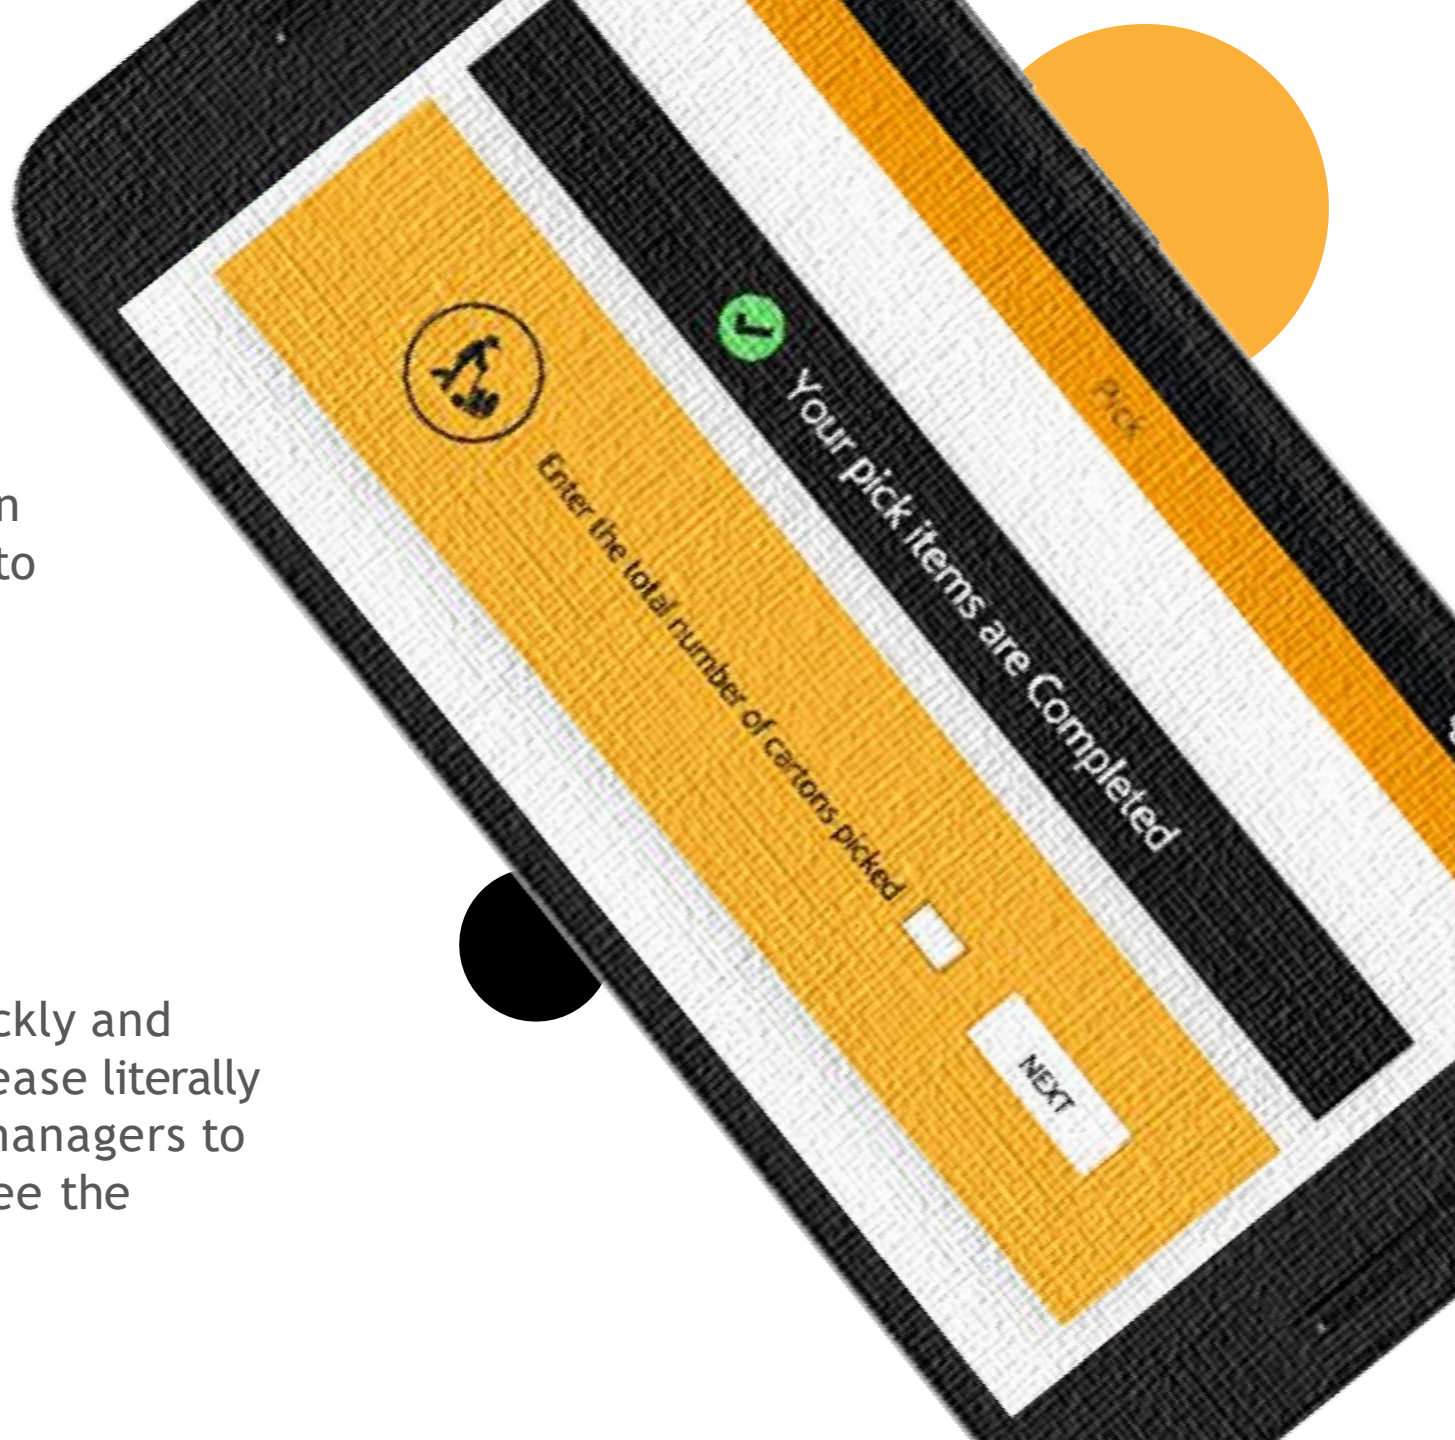

STREAMLINE THE PROCESS

The entire picking process is automated and orchestrated using mobile agents. Each assignment can be individually tracked from source to destination.

PROVIDE COMFORT & MOBILITY

Increase mobility for workers to quickly and comfortably pick and lift items with ease literally with the device on hand. Easier for managers to assign orders to workers and oversee the picking operation.

FAST, ACCURATE & COST-EFFECTIVE CASE PICKING SOLUTION

With SolGenie's iActo, overcome the challenges in picking operations in a shorter time without errors

- Increase Productivity
- Faster Order Fulfillment
- Improved Accuracy
- Real-time Operational Visibility
- Streamlined Management
- Better Decision-making

PROCESS SUMMARY

—
03

1

iActo receive route file from route management software

2

iActo extract the contents of the files & save the details in the database

3

Each pallet is assigned to the picker one at a time

4

The system advise the picker to choose the pallet type to start picking

5
